

# AI-Powered Performance and Load Testing Service

Provided by Ginsbourg.co.il (since 2008)

Ginsbourg.co.il

## About the Service:

At **Ginsbourg.co.il**, all performance and load testing are powered by advanced AI—automating test design, execution, and analysis. Our intelligent system simulates real-world traffic, detects bottlenecks, and ensures your software performs flawlessly under pressure. Custom AI-generated scripts assess websites and apps before launching and continue monitoring them in production. We support top-tier tools like **Apache JMeter**, **k6**, **LoadRunner**, and **SOASTA**, ensuring flexibility and precision. With AI at the core, we deliver faster insights, smarter testing, and superior system reliability.

## Key Features:

- ✓ **AI-Powered** – AI enhances the entire project, from KPI statements to results analysis and presentation.
- ✓ **Full Service** – No irritating self-service partial solutions. An end-to-end solution provided for all customers.
- ✓ **Open Source** – No software license fees at all for customers selecting 'Apache-JMeter' (recommended).
- ✓ **Script Reuse** – Any test script can later be used for monitoring your websites and web applications.
- ✓ **Cloud Ready** – All the above may be played on a wide selection of physical or virtual hosts on any cloud.
- ✓ **Mobile Users** – Any action by a mobile user can be simulated by an elaborated virtual test script.
- ✓ **Easily Configurable** – Rapid configuration of test scenarios, focus of testing, and test reports.
- ✓ **Email Integration** – Prompt reports are sent via e-mail and optional SMS.
- ✓ **Prompt Alerts** – Any deviation from the specified requirements of the customer would be reported.
- ✓ **Analysis Reports** – All the results would fully be analyzed and reported.
- ✓ **Flexible Scheduling** – Night runs are sometimes preferred to avoid disrupting daytime workflows.

## Key Benefits:

- ✓ **For your customers** – Performance and load testing assures superior end-user experience.
- ✓ **For your IT team** – Performance and load testing guarantees control of websites and web applications.
- ✓ **For your management** – Performance and load testing is a key for online business availability 24x7.
